

## IN SCOPE

*What's included?*

- Which areas, locations, or systems are part of the project?
- Which processes/data must we definitely take into account?
- What are the deliverables?

## OUT OF SCOPE

*What's excluded?*

- What do we deliberately exclude from the project?
- Which adjacent topics are NOT part of our mandate?
- Where might expectations arise that we need to reject?

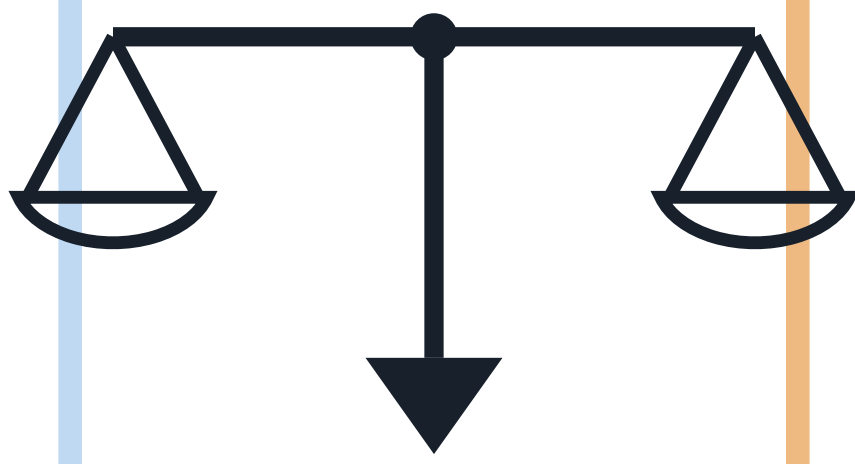

SC

## VALUE

*What for?*

- What goals do we want to achieve with this project?
- What problem are we solving - and for whom is it relevant?
- What concrete value does the outcome create?
- How will we measure, in the end, whether we achieved the goal?

PU

*does the  
value carry  
the cost?*

## COST

*How much?*

- What one-time investments does the project require?
- How are the costs broken down?
- What ongoing costs arise after the project ends?

CO

## TEAM

*Who?*

- Who is part of the project team, in what role?
- What capacity do those involved have available?

TM

## COMMUNICATION

*How?*

- What regular meetings and reports do we establish?
- Where do we document progress and decisions visibly?
- How do we handle escalations?

CT

## STAKEHOLDERS

*For whom?*

- Who is the sponsor and key decision-maker?
- Who benefits from the project, who might be disadvantaged?
- Who has already been involved in similar projects?
- Which other projects/programs are we dependent on?

SH

## METHOD MIX

*Which methods do we use in practice?*

- Which methods/tools do we use in which phase?
- Which of these are still new for this team or topic?
- Where is a simple tool enough, where do we need something more elaborate?

MM

## RISK & QUALITY

*Where?*

- What are the most likely risks?
- What do we mean by quality?
- Where are the potential bottlenecks?

RQ

## TIMELINE & ROADMAP

*When?*

- Is there an official start and end date for the project?
- Which milestones mark the way there?

Start

End
